Team Lead Name		Guttikonda Gayathri
Team Member Roll Number		2520030260
Team Member Name		Sai Sowseelya Vedula

1. Abstract

This project aims to develop a web-based plagiarism checker interface that simulates the workflow and user experience of modern plagiarism detection platforms. With the increasing use of digital content in education and research, plagiarism has become a major concern. Existing tools such as Turnitin and Grammarly help identify copied content, but many users are unaware of how these systems function and present analysis results through interactive interfaces.

The proposed system, *Plagiarism Check UI Mock*, is designed as a front-end web application that demonstrates the working model of a plagiarism checking platform. The application allows users to enter or upload text content and initiate a simulated plagiarism check through an interactive and user-friendly interface. The system then generates a mock analysis report containing plagiarism percentage, originality score, highlighted matched text sections, and a sample list of reference sources.

The application focuses on creating a responsive and visually structured user interface using modern web technologies such as HTML5, CSS3, JavaScript, and React.js. Features including dynamic result updates, loading animations, dashboard-style visualization, and responsive layouts improve usability and provide a realistic experience similar to real-world plagiarism detection systems. Although the project does not implement actual plagiarism detection algorithms, it effectively demonstrates the workflow, interface design, and result visualization techniques used in modern plagiarism checking platforms. Overall, the project serves as an educational and presentation-oriented prototype that showcases frontend development, UI design, and interactive web application concepts in a practical manner.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
User Interface Design (Homepage & Input Module)	2520030465	
Text Highlighting System	2520030260	
Frontend Integration Module	2520030465	
Result Dashboard & Visualization	2520030260	
Plagiarism Analysis Logic	2520030465	

API & Backend Services	2520030260	
Frontend-Backend Integration	2520030465,2520030260	
Responsive Design & Testing	2520030465,2520030260	

3. Module Details

Roll No: 2520030465 (Frontend Developer – UI Design & Integration)

Responsible for designing and developing the user interface and integrating frontend components for smooth user interaction.

Responsibilities:

- Design homepage layout and text input interface
- Implement text area, file upload UI, and action buttons
- Develop text highlighting feature for plagiarism simulation
- Integrate frontend components with backend services using Axios
- Ensure responsive design using CSS / Tailwind CSS
- Improve user experience with clean layout and interactive design

Roll No: 2520030260 (Frontend Developer – Result & Visualization)

Responsible for developing result processing components and implementing plagiarism analysis visualization features.

Responsibilities:

- Develop result dashboard displaying plagiarism percentage and originality score
- Create matched source panel and similarity result section
- Implement simulated plagiarism analysis logic using JavaScript
- Add loading animations, status indicators, and result visualization components
- Perform testing and debugging for smooth application functionality
- Assist in frontend-backend integration and response handling

4. Frameworks / Platforms / Software Used

Frontend:

- HTML5, CSS3, JavaScript (ES6+), React.js

Styling:

- Bootstrap / Tailwind CSS

Koneru Lakshmaiah Education Foundation

(Deemed to be University estd. u/s. 3 of the UGC Act, 1956)

Off-Campus: Bachupally-Gandimaisamma Road, Bowrampet, Hyderabad, Telangana - 500 043.

Phone No: 7815926816, www.klh.edu.in

Backend:

- Node.js, Express.js

API Communication:

- REST APIs, Axios

Routing:

- React Router

State Management:

- Context API / Local State

Tools & Package Manager:

- Npm, VS Code

Testing & Debugging:

- Postman, Browser Developer Tools

Storage:

- Local Storage

Version Control:

- Git & GitHub
